SUMMARY

Senior PHP/Laravel engineer with 12+ years building web applications and backend systems. Focused on Laravel, REST and user-facing API design, and PostgreSQL, with a test-first habit (Pest / PHPUnit, high coverage from day one). An earlier decade in embedded and IoT (binary hardware protocols, telemetry APIs, firmware in C) still shapes how I design data interfaces. I use AI daily, in production features and in development, with guardrails: strict schemas, deterministic tools, tests as the definition of done. Years of experience in English-only, SCRUM remote teams. Available for long-term remote contract work on a modern PHP/Laravel stack.

CORE SKILLS

PHP · Laravel · REST API design · PostgreSQL · MySQL · Pest / PHPUnit · Livewire · Vue.js · React · TypeScript · Inertia · Nette · ElasticSearch · Linux · IoT / LoRaWAN · embedded C (Atmel AVR / PIC)
AI: LLM integration (Claude, laravel/ai, structured output, tool use) · Claude Code

EXPERIENCE

PHP Developer - Freelance (self-employed) 2022 - present
- Build web applications with REST and user-facing APIs. Laravel, Livewire, Vue.js, PostgreSQL.

PHP Developer - UBK s.r.o. 2021 - 2022
- Laravel development across multiple client products.

Developer - Freelance 2018 - 2021
- Built a CMS for an international company. SCRUM, English-only daily communication. PHP 8, Nette 3.1, MariaDB.

Developer - MySolutions s.r.o. 2016 - 2018
- Developed and maintained dating platforms across 12 countries. SCRUM, English-only standups. PHP, Nette, MySQL.

IT Administrator and Developer - Yazaki, Plzen 2013 - 2015
- In-house software for warehouse management of wiring harnesses, alongside IT administration.

Earlier - Embedded, IoT and Systems Engineering
- Firmware in C (Atmel AVR / PIC), including a banknote validator; telemetry data APIs.
- Linux and Windows server administration; Delphi / FoxPro business applications.

APPLIED AI

- **Billify** - Claude extracts supplier PDF invoices for the VAT return (structured output, temperature 0). The Czech National Bank (ČNB) rate comes from a tool, not the model; a human confirms every row. ~$0.01 per PDF.
- **pis-cesky** - open-source Claude Code plugin that makes AI write natural Czech: rules derived from human-written text and a proofreading agent that never sees the brief. github.com/rajtik76/pis-cesky

SELECTED PROJECTS & OPEN SOURCE

- **CaptchaAPI** - GDPR-first, proof-of-work CAPTCHA for the EU; ships its own Laravel package and WordPress plugin.
  Laravel · WordPress · Composer / Packagist
- **Billify** - invoicing REST API for the Czech market, with an AI-assisted VAT return module.
  Laravel · REST API · PostgreSQL · laravel/ai
- **Exile to Exile** - free, open-source Path of Exile 2 companion: build planner, passive-tree tools, loot-filter generator and shareable builds. Includes automated game-data releases with CI contract tests and safe activation/rollback.
  Laravel 13 · PHP 8.4 · React · Inertia · TypeScript · PostgreSQL · Redis
- **POE2 Toolkit** - framework-agnostic TypeScript toolkit for GGPK access, typed game-data extractors and a headless passive-tree geometry engine with a React renderer; published as MIT npm packages and used by Exile to Exile.
  TypeScript · React · npm · CI · MIT open source
- **Weather Station** - end to end: ESP32 firmware in C++ (I2C / I2S sensors, rain from the microphone spectrum, offline buffer on flash, KiCad schematics), Laravel ingest API, Livewire dashboard. A regression model calibrated against Czech Hydrometeorological Institute (ČHMÚ) data removes solar heating of the radiation shield; validated on held-out days. Live at weather.rajtik.com.
  ESP32 · C++ · I2C / I2S · KiCad · Laravel · Livewire · PostgreSQL · github.com/rajtik76/weather-station
- **laravel-blog.cz** - Czech-language blog about Laravel, backend engineering and AI-assisted development.

EDUCATION & LANGUAGES

Secondary technical school, Maturita - Electronics, Telecommunications and Computing. SPS Ostrov.
English - working proficiency. Czech - native.
